

# Latent Shifter cards, FAQ #1

Latent Shifters are a way to add a large variety to the character types and character histories to the game. It also allows the players to get a look at the strange chaotic workings of the Dragon's Blood, magic, Od and Warp on the inhabitants of Grandilar.

The Latent Shifter cards presented here vary from the Deluxe cards. With the Deluxe cards we tried to conserve space by cramming the concept into a single card. In the Standard Sets we have the ability to spread out and be more comfortable. The original cards are fine and do not need to be replaced.

To make a latent Shifter character she starts with a non-shifting character, such as a Tigrean or Das Karr that does not list a shifter race on the card. The first step then is for the character to acquire the "Latent Shifter" card. This gives the character Dragon's Blood, but they are not yet a shifter. Once the player and GM are in agreement a character may become a full shape shifter. The "Latent Shifter" card is replaced by a full shifter card, such as Latent Dragon Shifter, and they become full shape shifters.

The Latent Shifter cards are not intended to allow characters to acquire two shifter ability lines, such as Dragon and Unicorn. No single character should ever have access to more than one set of shifter abilities.

The first Latent Shifter set covers the shifter characters that appeared in the original Dragon Storm and Kanchaka sets. The second Latent Shifter set covers the characters added as Deluxe cards, and beyond. In later printings of the second set we can replace "Full Latent Shifter" cards with new specific shifter races.

The Full Latent Shifter has been added to cover future shifter races or a players need for more variety.

The Wereshark Latent Shifter has some problems that a player would have to deal with. This should be left to expert role-players who want a challenge. The card has additional restrictions, read carefully.
